Banking

Ticker

MRDT

Quarter

Q3 2026

Revenue

$1.45B

Revenue Growth Yoy

6.8%

Net Profit

$319.0M

Profit Margin

22.0%

Key Highlights

• Net Interest Margin (NIM) expanded by 14 basis points to 3.12%, driven by favorable loan yields.
• Assets Under Management (AUM) in the Private Wealth segment increased by 12% year-over-year to $42.5B.
• Provision for credit losses decreased to $45M, down from $52M in Q2 2026, reflecting stable regional economic indicators.

Management Commentary

Our third-quarter performance reflects the resilience of our core deposit franchise and disciplined expense management in a stabilizing rate environment. We have seen strong organic loan growth within our middle-market commercial portfolio, while our wealth management business continues to deliver record fee income.

Risks And Challenges

• Potential compression of net interest margins if regional central banks accelerate interest rate cuts in early 2027.
• Elevated competition for high-yield deposit products, putting upward pressure on funding costs.
• Persistent, moderate commercial real estate (CRE) exposure requiring ongoing provisioning adjustments.

Outlook Next Quarter

Looking ahead to Q4 2026, we anticipate mid-single-digit loan growth and stable net interest income. We will continue to focus on digital retail banking enhancements while maintaining a conservative credit underwriting posture to navigate macroeconomic uncertainties.
